Buat folder [id] di dalam folder events, dan buat file page.tsx di dalamnya untuk membuat halaman detail event.

Buat tampilannya seperti ini.

```
1  <>
2  <div className="breadcrumbs text-sm mb-2">
3    <ul>
4      <li><Link href="/panel">Dashboard</Link></li>
5      <li><Link href="/panel/events">Events</Link></li>
6      <li>Detail Event</li>
7    </ul>
8  </div>
9  <div className="flex justify-between items-center mb-3">
10    <h1 className="font-semibold text-xl">Detail Event</h1>
11    <div className="flex">
12      <Link href="/panel/events" className="btn btn-outline mr-2">Back</Link>
13    </div>
14  </div>
15  <div className="grid grid-cols-5 gap-6">
16    <div className="md:col-span-2 col-span-5">
17      <div className="card shadow-sm">
18        <div className="card-body">
19          <img src={process.env.NEXT_PUBLIC_API_HOST + event.thumbnail} alt="" className="w-full rounded mb-2" />
20          <h3 className="font-semibold text-lg mb-1">{event.title}</h3>
21          <p className="mb-2 text-justify">{event.description}</p>
22          <div className="stats shadow text-nowrap">
23            <div className="stat place-items-center">
24              <div className="stat-title">Location</div>
25              <div className="font-semibold">{event.location}</div>
26            </div>
27
28            <div className="stat place-items-center">
29              <div className="stat-title">Date</div>
30              <div className="font-semibold">{format(new Date(event.date), 'dd MMMM yyyy, HH:mm', { locale: idn })} WIB</div>
31            </div>
32
33            <div className="stat place-items-center">
34              <div className="stat-title">Quota</div>
35              <div className="font-semibold">{event.quota - event.registrations.filter((reg: any) => reg.status === 'APPROVED').length}/{event.quota}</div>
36            </div>
37          </div>
38        </div>
39      </div>
40    </div>
41    <div className="md:col-span-3 col-span-5">
42      <div className="stats shadow mb-5 w-full">
43        <div className="stat place-items-center">
44          <div className="stat-title">Pending</div>
45          <div className="stat-value text-warning">{event.registrations.filter((reg: any) => reg.status === 'PENDING').length}</div>
46        </div>
47        <div className="stat place-items-center">
48          <div className="stat-title">Approved</div>
49          <div className="stat-value text-success">{event.registrations.filter((reg: any) => reg.status === 'APPROVED').length}</div>
50        </div>
51        <div className="stat place-items-center">
52          <div className="stat-title">Cancelled</div>
53          <div className="stat-value text-error">{event.registrations.filter((reg: any) => reg.status === 'CANCELLED').length}</div>
54        </div>
55        <div className="stat place-items-center">
56          <div className="stat-title">Rejected</div>
57          <div className="stat-value text-error">{event.registrations.filter((reg: any) => reg.status === 'REJECTED').length}</div>
58        </div>
59        <div className="stat place-items-center">
60          <div className="stat-title">Attended</div>
61          <div className="stat-value text-info">{event.registrations.filter((reg: any) => reg.attendance === 'ATTENDED').length}</div>
62        </div>
63      </div>
64    <div className="card shadow-sm">
65      <div className="card-body">
66        <h1 className="font-semibold text-lg mb-2">Registrations</h1>
67        <div className="overflow-x-auto">
68          <table className="table text-nowrap">
69            <thead>
70              <tr>
71                <th></th>
72                <th>Name</th>
73                <th>NPM</th>
74                <th>Major</th>
75                <th>Status</th>
76                <th>Attendance</th>
77                <th>Action</th>
78              </tr>
79            </thead>
80            <tbody>
81              <tr>
82                <td></td>
83              </tr>
84            </tbody>
85          </table>
86        </div>
87      </div>
88    </div>
89  </div>
90  </>
```

Halaman akan terlihat seperti ini. Menampilkan detail acaranya mulai dari thumbnail, judul, deskripsi, lokasi acara, tanggal & waktu acara, serta kuota peserta. Di sebelah kanan atas menampilkan peserta dengan status tersebut. Dan di bawahnya menampilkan list data peserta yang sudah melakukan pendaftaran.

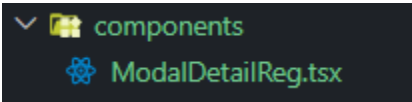

Buat method fetch data ke backend.

Buat method handle hapus data registrant.

Implementasikan data registrasi ke table.

[illegible]

Buat component modal untuk menampilkan detail registrasi

Isinya seperti ini

Implementasikan ke halaman detail, jika ada data yang di select maka tampilkan modal.

```
1 {selectReg && (  
2   <ModalDetailReg registration={selectReg} onClose={() => setSelectedReg(null)} />  
3 )}
```

Untuk contoh tampilan modalnya nanti setelah kita coba lewat halaman frontend.
