Buat folder create di dalam folder majors, dan buat file page.tsx di dalamnya untuk membuat halaman buat data program studi.

Buat tampilan halamannya seperti ini

```
1 <>
2 <div className="breadcrumbs text-sm mb-2">
3   <ul>
4     <li><Link href="/panel">Dashboard</Link></li>
5     <li><Link href="/panel/majors">Majors</Link></li>
6     <li>Add major</li>
7   </ul>
8 </div>
9 <div className="flex justify-between items-center mb-3">
10  <h1 className="font-semibold text-xl">Add major</h1>
11  <div className="flex">
12    <Link href="/panel/majors" className="btn btn-outline mr-2">Back</Link>
13    <button type="submit" form="add-form" className="btn btn-neutral">Save</button>
14  </div>
15 </div>
16 <div className="card shadow-sm">
17   <div className="card-body">
18     {error &&
19       <div role="alert" className="alert alert-error">
20         <svg xmlns="http://www.w3.org/2000/svg" className="h-6 w-6 shrink-0 stroke-current" fill="none" viewBox="0 0 24 24">
21           <path strokeLinecap="round" strokeLinejoin="round" strokeWidth="2" d="M10 1412-2m0 012-2m-2 21-2-2m2 212 2m7-2a9 9 0 11-18 0 9 0 0118 0z" />
22         </svg>
23         <span>{error}</span>
24       </div>
25     }
26     <form onSubmit={handleSubmit} id="add-form">
27       <fieldset className="fieldset col-span-1">
28         <legend className="fieldset-legend">Name</legend>
29         <input type="text" value={name} onChange={(e) => setName(e.target.value)} className="input w-full" placeholder="Ex: Sistem Informasi" required />
30       </fieldset>
31     </form>
32   </div>
33 </div>
34 </>
```

Buat method handle submit, state untuk menampung data input dan error.

```
1  const [name, setName] = useState('')
2  const [error, setError] = useState('')
3
4  const token = Cookies.get('token')
5
6  const router = useRouter()
7
8  const handleSubmit = async (e: React.FormEvent) => {
9    e.preventDefault()
10
11    try {
12      await axios.post('/majors', {name}, {
13        headers: {
14          Authorization: `Bearer ${token}`
15        }
16      })
17      router.push('/panel/majors')
18    } catch (err: any) {
19      setError(err.response?.data?.message)
20    }
21  }
```

Coba buat data
